ABSTRACT

Winged, feathered friends helped to inspire the airplane and have always interested human bird watchers. In this videotape, children learn about the main characteristics of birds and look at their similar needs. Students find out about the process of egg laying and hatching in some of the most common birds. This videotape correlates to the following National Science Education Standards for Life Science: characteristics of organisms; life cycles of organisms; and organisms and environments. The videotape is accompanied by a teacher's guide and a hands-on student experiment. (CCM)
